

Harbour

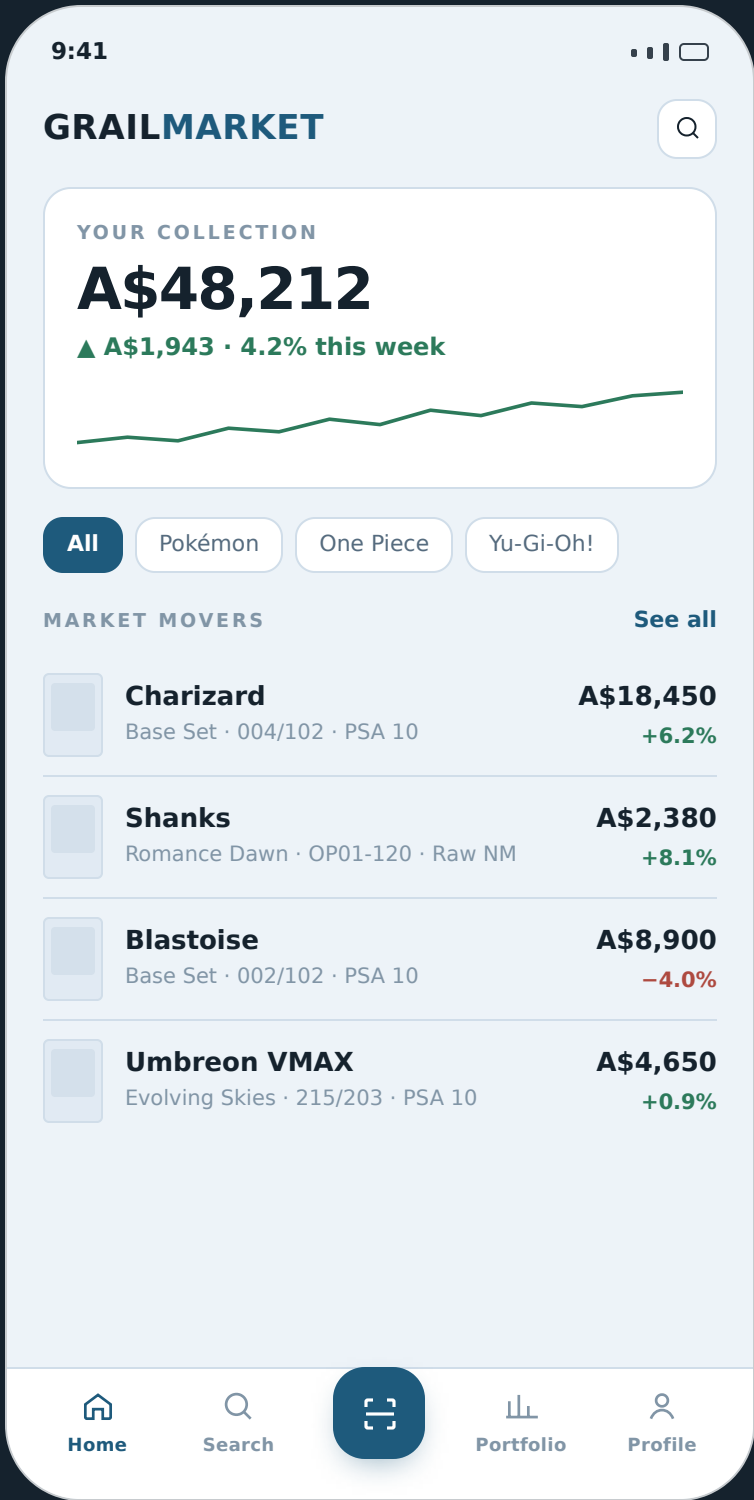

A pale marine ground with a deep harbour blue for every action. Soft cards, generous corners, and white reserved for the surfaces that hold a number. **The other literal reading of the brief, and the one that most resembles a well made banking app.** Familiar in the way that a person trusts without noticing.

						
GROUND #EDF3F8	SURFACE #FFFFFF	LINE #D0DDE9	INK #15222D	MARINE #1E5A7C	UP #2C7A5B	DOWN #AE4A40

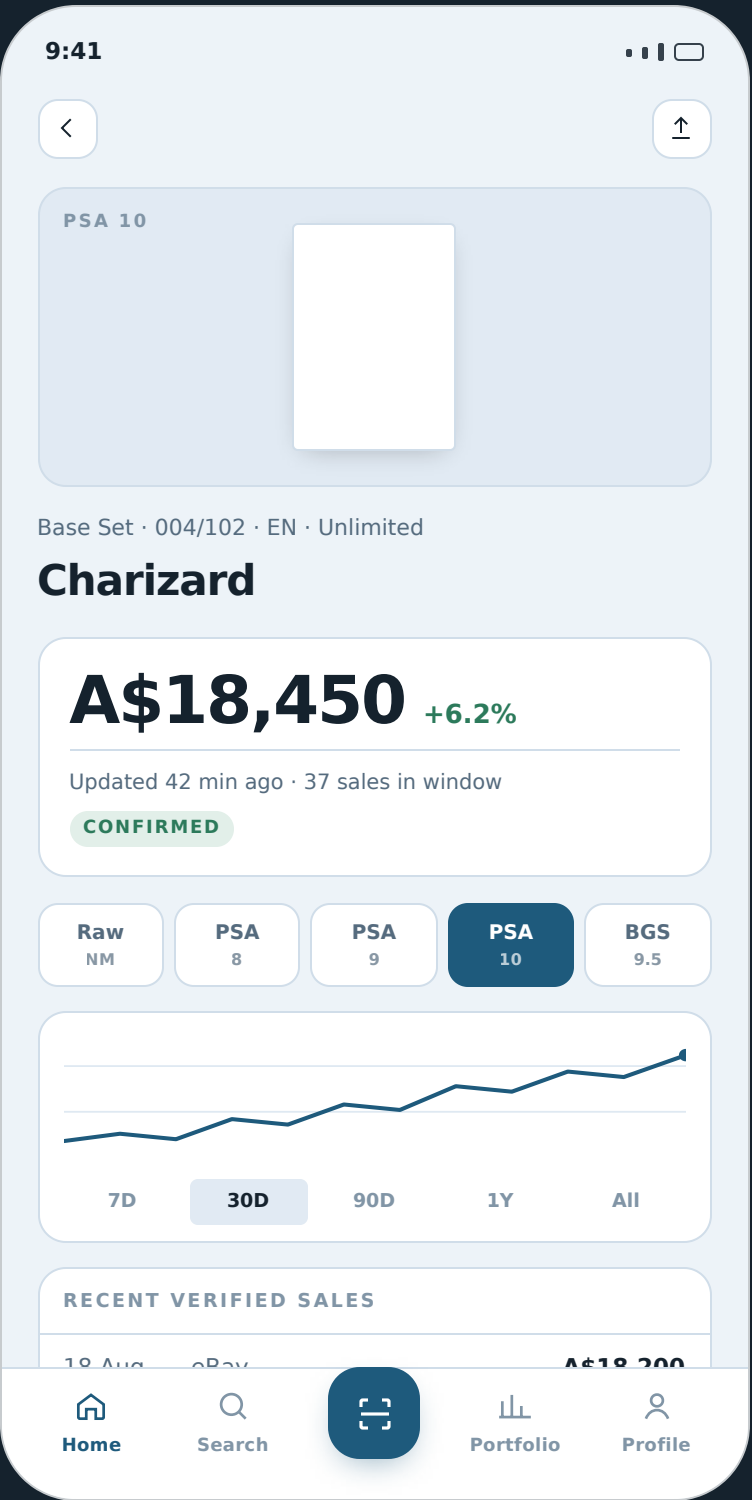

The same three screens

Every direction is shown on identical screens with identical data, so the comparison is about colour and nothing else.

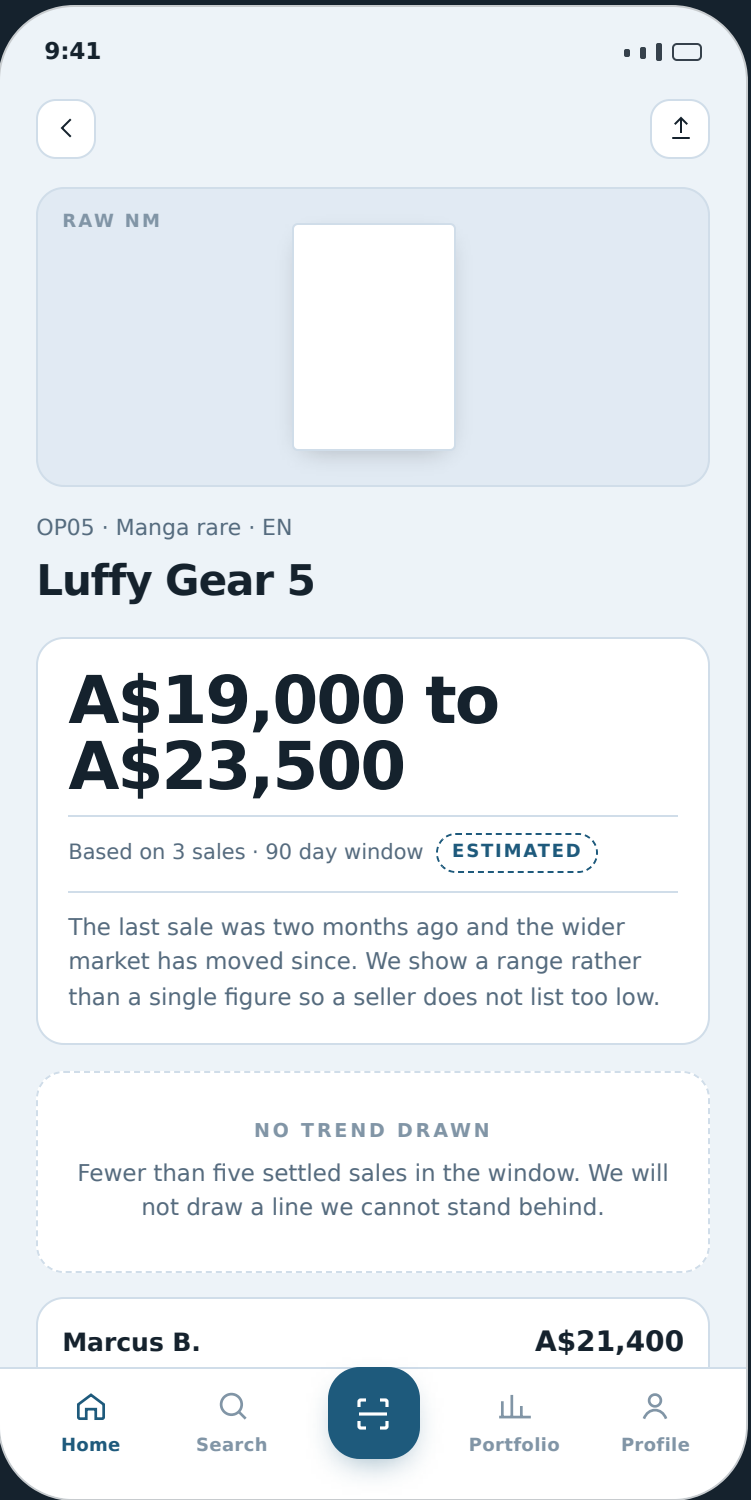

HOME

CARD PAGE · CONFIRMED PRICE

CARD PAGE · ESTIMATED, THIN DATA

WHERE THE COLOUR WORKS HARDEST

On the price block. Setting the figure on white inside a tinted ground gives it a frame without drawing a box around it, which is what keeps the screen calm while the number still leads.

SEMANTIC COLOUR

Rising and falling prices, and the difference between a confirmed price and an estimate, are the only places colour carries meaning. The green is pulled slightly blue so it belongs to the palette. The red is closer to brick than to signal red, because a falling price is information, not a fault.

HONEST ABOUT THE TRADE OFF

This is the most familiar of the five, which is both its strength and its risk. It will not be mistaken for a competitor, but it will not be mistaken for anything else either.
